

WELCOME TO STAMIGOLD COMPANY LIMITED

VIP'S GUIDE
TO
THE STAMIGOLD
BIHARAMULO MINE

Dear Honorable Visitor,

It is our pleasure to welcome you to STAMIGOLD Biharamulo Mine, the only mine owned and operated by the government of the United Republic of Tanzania.

To make your visit more pleasant the Management of the STAMIGOLD Biharamulo Mine has prepared these guidelines for your information while you are visiting with us.

***“Our First Duty and Highest Obligation
is your Health and Safety.”***

We trusts that nothing is more important than the health and safety of the employees living in the site, visitors and the surrounding communities. The Company has, thus, thrived to conduct the day to day business in compliance with applicable Tanzanian laws and regulations in place for mining activities.

As such we humbly request your cooperation in the following:-

- Make declaration of any electronic devices and/or firearms with you;
- Participate in the security searches prior to entering the site but also when leaving the site;
- Participate in the site safety induction;
- Follow instructions as provided by the Emergency Response Team as provided incase of emergency and
- Make a report of any incident that would have adverse effect to the safety of those around you during your visit.

Useful Information about the Mine Site.

Facilities

The mine site has meeting rooms, guest houses, kitchen, lunch and dining mess, a gym, security quarters, magazines, workshops and office buildings.

Clinic

There are two resident medical doctors at site operating the clinic and one emergency vehicle. If at anytime during your visit, you feel unwell please consult them.

Meals

All meals are prepared by our own staff in the main kitchen and served to everyone in the site. If you have a special diet requirement, please let us know. Otherwise our chefs are the best!

Dress Code

The dress code at site requires the long sleeved shirts, jeans and boots/ covered shoes. The dress code will prevent mosquito bites while the safety boots are best to walk in the mining site which has the red dusty dirt soil and muddy during the rain season.

Personal Protective Equipment

The Personal Protective Equipment “PPE” such as hard hats, reflector vests and safety glasses will be provided by Safety officers during your visit.

Useful Information about the Mining Site and Process Plant.

Mining Site

STAMIGOLD Biharamulo Mine uses open pit mining. The mine uses excavators and dump trucks to move materials that will be processed in the Process Plant.

Process Plant

The Process Plant is where the gold is extracted from the ore delivered from the mining site. The Process Plant has Operations, Laboratory, Metallurgy and the Maintenance sections.

Tailings Storage Facility “TSF”

The TSF is where all remained material (tailings) after extraction of valuable metals (Gold and Silver) are stored. The TSF contains about 8,600,000 tons of tailings.

The Gold Room

The law requires our mines to have a storage facility for safe storage of the extracted minerals. Thus, the Gold room which is located in the Process Plant is where our final products, gold bars are smelted and stored before being sold to the market.

Please use these numbers while at site
